## Tugas Jurnal Modul 15

1. App.js

```
. .
const fs = require('fs');
const crypto = require('crypto');
const readline = require('readline');
 const path = require('path');
function hashPassword(password) {
    return crypto.createHash('sha256').update(password).digest('hex');
 function isValidUsername(username) {
        const regex = /^[A-Za-z]{4,20}$/;
return regex.test(username);
// Validasi password
function isValidPassword(password, username) {
   const regex = /^(?=.*[@-9])(?=.*[!@#$%^&*])[A-Za-z0-9!@#$%^&*]{8,20}$/;
   return regex.test(password) && !password.includes(username);
function register(username, password) {
   if (!isValidUsername(username)) {
      console.log("Username tidak valid. Hanya huruf (A-Z), panjang 4-20 karakter.");
if (!isValidPassword(password, username)) { console.log("Password harus 8-20 karakter, mengandung angka & simbol (!@#$%^&*), dan tidak mengandung username.");
               return;
        let users = {};
if (fs.existsSync(userFile)) {
   users = JSON.parse(fs.readFileSync(userFile));
        if (users[username]) {
    console.log(" \( \) Username sudah terdaftar.");
                return;
        users[username] = hashPassword(password);
fs.writeFileSync(userFile, JSON.stringify(users, null, 2));
console.log("☑ Registrasi berhasil!");
        const users = JSON.parse(fs.readFileSync(userFile));
const hashed = hashPassword(password);
        } else {
               console.log("Username atau password salah.");
// Interface CLI
const rl = readline.createInterface({
  input: process.stdin,
  output: process.stdout
console.log("=== Aplikasi Login Sederhana ===");
console.log("1. Registrasi");
console.log("2. Login");
rl.question("Pilih opsi (1/2): ", (option) => {
    rl.question("Masukkan username: ", (username) => {
        rl.question("Masukkan password: ", (password) => {
            if (option === '1') {
                register(username, password);
            } else if (option === '2') {
                login(username, password);
            }
}
                       } else {
```

## Outputnya: erFile.js

=== Aplikasi Login Sederhana ===

Registrasi
 Login

Pilih opsi (1/2): 1

Masukkan username: reza

Masukkan password: aku12345678

Penerapan prinsip secure coding practices, disaat kita regist system memvalidasi bahwa Username hanya terdiri dari huruf dan Panjang char 4-20, password harus 8-20 char dan harus mengandung angka dan symbol khusus serta tidak mengandung username.
